

## Science of the week

08.05.20

### Can I grow a rainbow?

- You will need:**
- Kitchen roll
  - Felt tip pens
  - Two bowls of water
  - Paper clip/ bull

### Instructions:

1. Cut the kitchen roll into the shape of a rainbow.
2. Attach the bull dog clip to the top of the rainbow and attach thread to this (optional but makes it easier to hold).
3. Colour a rainbow with felt tip pens from the bottom of both the ends of the rainbows up about 2-3 cm.
4. Hold the rainbow over the water, with the ends slightly in the water and watch the colours travel up your rainbow.
