Week beginning 11.10.21

Hello!

This week we are focussing on understanding that numerals represent a specific quantity and the last number we count is how many we have. Why not make a point of counting at home....

It could be plates and cups on the table, steps, cars, coats on the pegs, biscuits on the plate etc. If you have some paper handy you could then write the number.

You may have noticed that we have a growing area in our playground. This week we will be planting some daffodil and tulip bulbs in pots.
