

Our Maths Learning Journey

Key vocabulary:
Line of symmetry
Polygons
Vertices
Edges
Regular and
irregular polygons

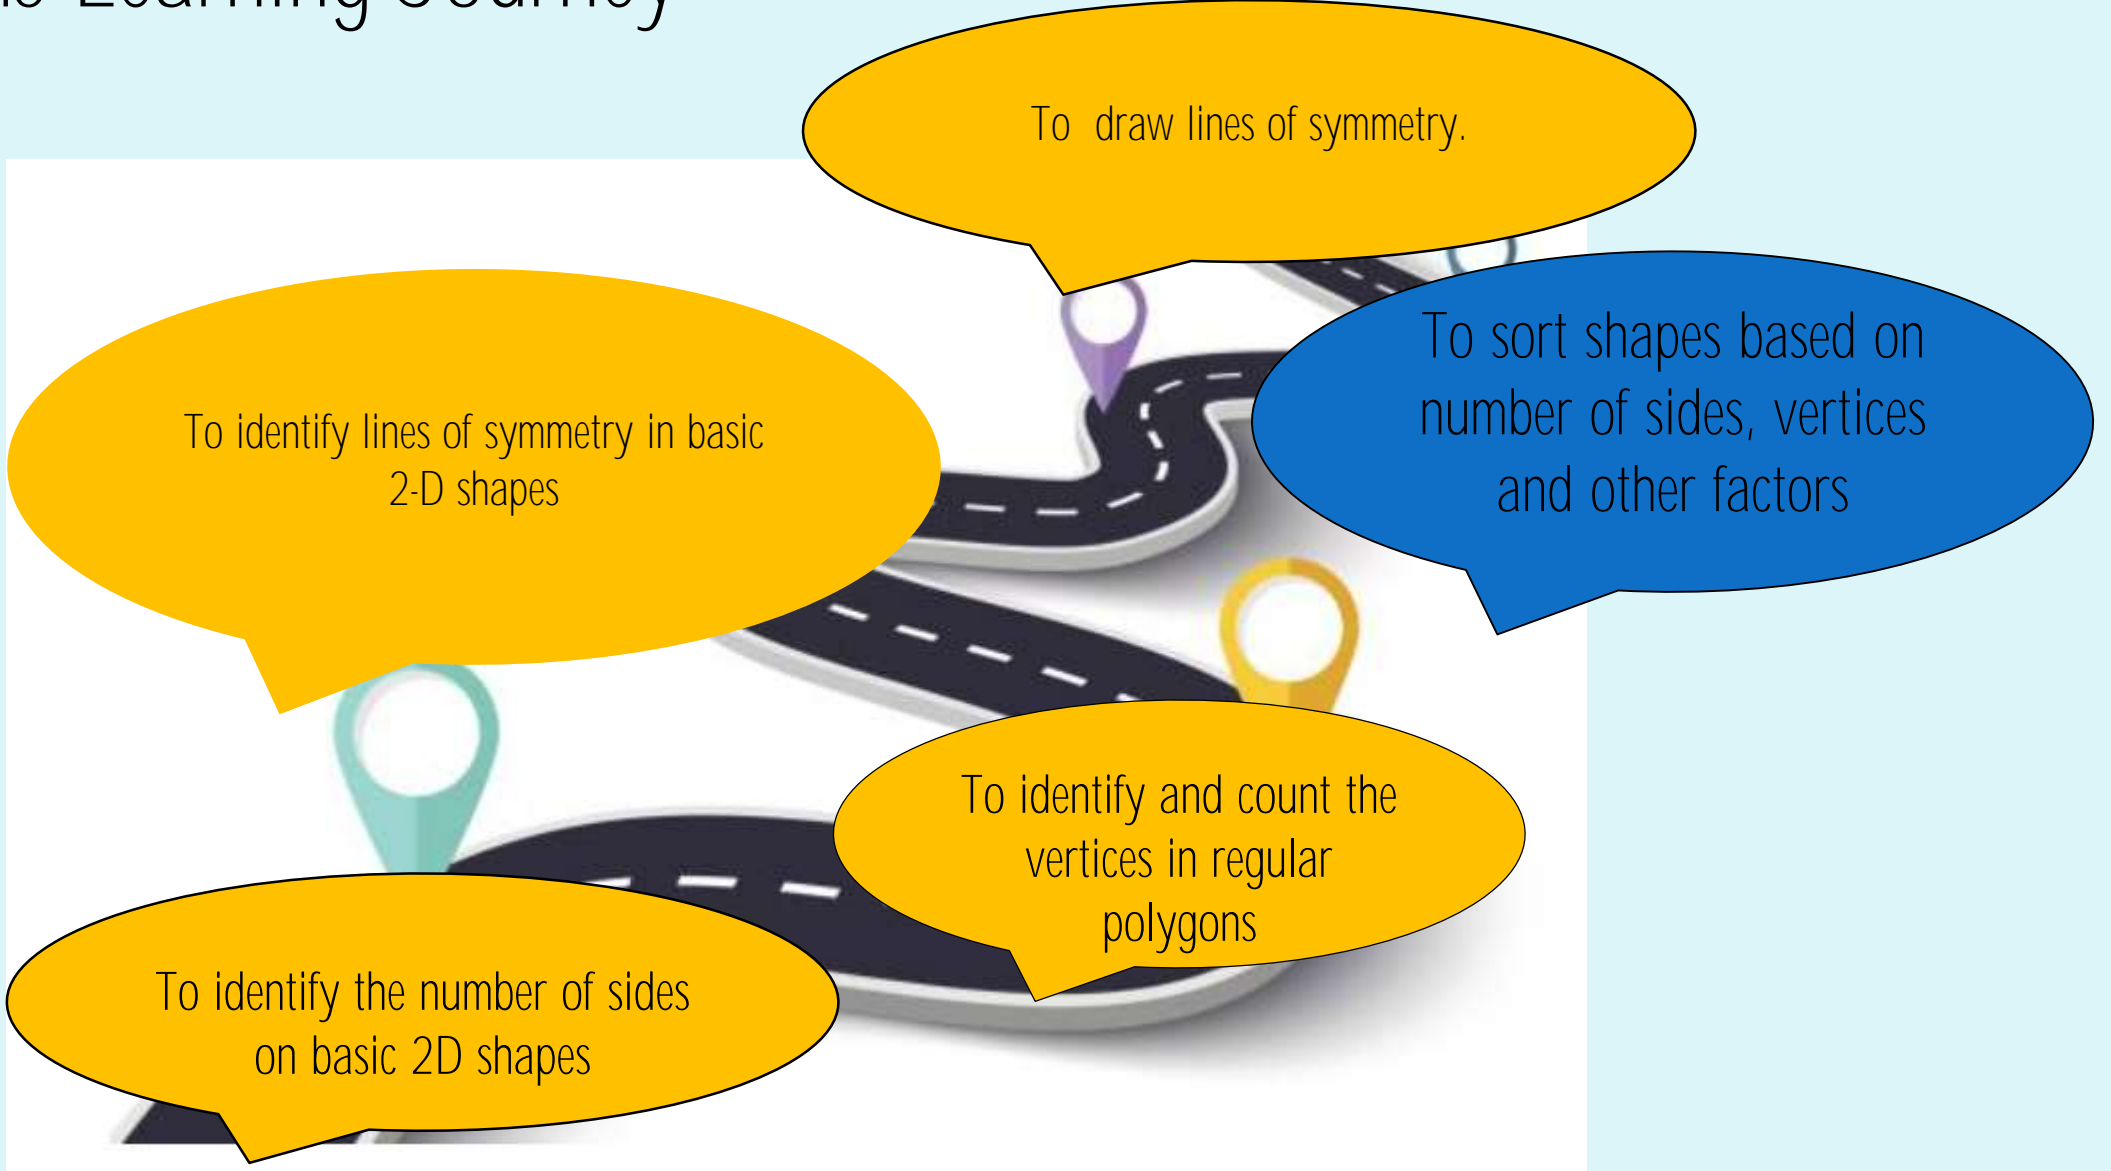

To identify lines of symmetry in basic
2-D shapes

To draw lines of symmetry.

To sort shapes based on
number of sides, vertices
and other factors

To identify and count the
vertices in regular
polygons

To identify the number of sides
on basic 2D shapes

20.02.2024

Challenge of the week

Think of your own ways of sorting these into two groups.

CHALLENGE

I thought of sorting them by symmetry.

There are lots of different ways. Has someone else thought of a different way to sort them?

177

Mental Maths

Add the 2 two-digit numbers using the column method.

$36+27$

$48+15$

$63+19$

$18+29$

$46+28$

Self assessment

Do you understand how to add
using regrouping?

20.02.2024

LQ: Can I identify the number of sides on 2D shapes?

Steps to Success:

I can name 2D shapes.

I can identify the number of sides on 2D shapes.

STAR WORDS

polygon

circle

triangle

square

rectangle

regular

pentagon

hexagon

octagon

oval

irregular

rhombus

semicircle

parallelogram

trapezium

quadrilateral

20.02.2024

LQ: Can I identify the number of sides on 2D shapes?

Today you are going to recap about the properties of 2D shapes.

Let's recap: <https://www.youtube.com/watch?v=1yID0JzpVo8>

What words would you use to describe the 2D shapes?

2D shapes are flat shapes. They have sides and vertices. Some sides are straight and some are curved. Vertices are the corners.

20.02.2024

LQ: Can I identify the number of sides on 2D shapes?

2D or Flat Shapes

Corner / vertex– where two sides meet.

Side – the edge of the shape

20.02.2024

LQ: Can I identify the number of sides on 2D shapes?

TASK

Practical

You are going to explore shapes. Use tally charts and bar graph to record the sides of each shape.

You can use Venn diagram and sort shapes according to the number of sides. In groups pick the shapes. After that you can count how many people hold triangles, squares and record it using tally marks.

Tally					
Total

21.02.2024

LQ: Can I identify and count the vertices in regular polygons?

Today you are going to recap about the properties of 2D shapes.

Let's recap:

What words would you use to describe the 2D shapes?

2D shapes are flat shapes. They have sides and vertices. Some sides are straight and some are curved. Vertices are the corners.

21.02.2024

LQ: Can I identify and count the vertices in regular polygons?

2D or Flat Shapes

Recap:

Corner or vertex – where two sides meet.

Side – the edge of the shape

21.02.2024

LQ: Can I identify and count the vertices in regular polygons?

What words would you use to describe the 2D shapes?

Regular polygons

Polygons are closed shapes with straight sides. These are regular polygons. All the sides and all the angles are equal.

Irregular polygons

These are irregular polygons. All the sides and angles are unequal.

21.02.2024

LQ: Can I identify and count the vertices in regular polygons?

Share

a) Mia's picture has two squares.

Which picture has two squares?

I think squares look like this .

No. That is a rectangle but not a square. A square is a rectangle where all the sides are the same length. Rectangles and squares are **quadrilaterals** because they have four sides.

This is Mia's picture.

b) This is Sunil's picture.

A triangle can be printed in different ways. Remember that a triangle that appears to be upside-down is still a triangle.

Parallelogram

Rectangle

Rhombus

Square

Trapezium (UK)

Kite

Quadrilaterals = 2D shapes with 4 straight sides.
Quad means 4 and lateral means sides.

21.02.2024

LQ: Can I identify and count the vertices in regular polygons?

TP: What is the name of this 2D shape?

How many sides does it have?

How would you describe side?

Does it have corners or vertices? How many?

Circles only have one side.

Circles have no corners.

21.02.2024

LQ: Can I identify and count the vertices in regular polygons?

TP: What is the name of this 2D shape?

How many sides does it have?

How would you describe sides?

How many corners/vertices does it have?

Is it regular or irregular polygon?

Is it quadrilateral?

Squares have 4 straight sides and 4 corners/ vertices.
All the sides are the same length. Quadrilateral, regular.

21.02.2024

LQ: Can I identify and count the vertices in regular polygons?

TP: What is the name of this 2D shape?

How many sides does it have?

How would you describe sides?

How many corners/vertices does it have?

Is it regular or irregular polygon?

Is it quadrilateral?

Rectangles have 4 straight sides and 4 corners. They have 2 long sides and 2 short sides. Quadrilateral, regular.

21.02.2024

LQ: Can I identify and count the vertices in regular polygons?

TP: What is the name of this 2D shape?

How many sides does it have?

How would you describe sides?

How many corners/vertices does it have?

Is it regular or irregular polygon?

Is it quadrilateral?

Triangles have 3 straight sides and 3 vertices/corners. Regular.

21.02.2024

LQ: Can I identify and count the vertices in regular polygons?

Look at the shapes on your table.

TP: What is the name of 2D shape?

- How many sides does it have?
- How would you describe sides?
- How many corners/vertices does it have?
- Is it regular or irregular polygon?
- Is it quadrilateral?

21.02.2024

Self assessment

Do you understand what to do?

LQ: Can I identify and count the vertices in regular polygons?

Complete the tasks in the books.

What Am I?

I am a 2D shape.

I have six sides.

I have six vertices.

All my sides are straight.

1. Look at 2D shapes and record their properties.

Shape	Sides	Number of Vertices	Number of Corners	Number of Edges	Number of Faces	Other Features
						
						
						
						

2.

1. Which shape is the odd one out? Explain why.

3.

Evan says,

A circle has zero sides.

These shapes all have 4 sides so they must all be rectangles.

Is he correct? Convince me!

$$\begin{array}{r} 62 \\ - 44 \\ \hline \\ \hline \end{array}$$

22.02.2024

LQ: Can I investigate vertical line symmetry?

Steps to Success:

I can say if a line of symmetry has been drawn correctly.

I can complete half of a symmetrical shape.

I can investigate statements about symmetry.

symmetry

line of symmetry

vertical

reflective

22.02.2024

LQ: Can I find lines of symmetry in 2D shapes?

TP- What does symmetry mean?
What does reflective mean?

Symmetry is when an object looks the exact same on one side as the other. To see if an object is symmetrical, you draw a line of symmetry or a line dividing an object to show a perfect match on each side. It's like making a mirror image.

Capable of reflecting light, images, or sound waves

LQ: Can I investigate vertical line symmetry?

Symmetry

Something is symmetrical **when it has two matching halves**. You can check for symmetry in a shape by drawing a mirror line down the middle and seeing if both halves are identical.

Reflective

Reflective symmetry is **where a shape or pattern is reflected in a mirror line or a line of symmetry**. The shape that has been reflected will be the same as the original, it should also be the same size and it will be the same distance away from the mirror.

LQ: Can I investigate vertical line symmetry?

Symmetry is all around us

We can see symmetry in nature, architecture, shapes and letters.

nature

architecture

letters

LQ: Can I investigate vertical line symmetry?

Line of symmetry

Self assessment

Do you understand what a line of symmetry is?

TP - Where will the line of symmetry be on the butterfly? How do you know?

Look around the room. Can you see anything that has a line of symmetry?

Remember It

You can draw a vertical line of symmetry on each of these shapes without turning them.

false

true

true

false

true

false

Could the other shapes have a vertical line of symmetry drawn on them if they were turned?

Vertical Lines of Symmetry

Vertical lines of symmetry have been drawn on these shapes.
Has it been done correctly? How do you know?

yes

no

yes

no

yes

Which of the incorrect ones does have a vertical line of symmetry?

Can you name any of these shapes?

Symmetrical Shapes

Here is half of a symmetrical shape. What would the other half look like?

Remember the **line of symmetry** is sometimes called the **mirror line**.

Symmetrical Shapes

Here is half of a symmetrical shape. What would the other half look like?

Symmetrical Shapes

Here is part of a symmetrical shape.

Symmetrical Shapes

Here is part of a symmetrical shape.

What could it look like?

Create 3 different possible shapes.

There are lots of possible shapes that could be made.

Alphabet Symmetry

10 letters of the alphabet have vertical lines of symmetry.

True or false? How do you know?

False, 11 letters
have a vertical line
of symmetry.

22.02.2024

LQ: Can I investigate vertical line symmetry?

Complete the tasks in the given paper. Use a mirror to help you.
Count squares as well.

Self assessment

Do you understand what to do?

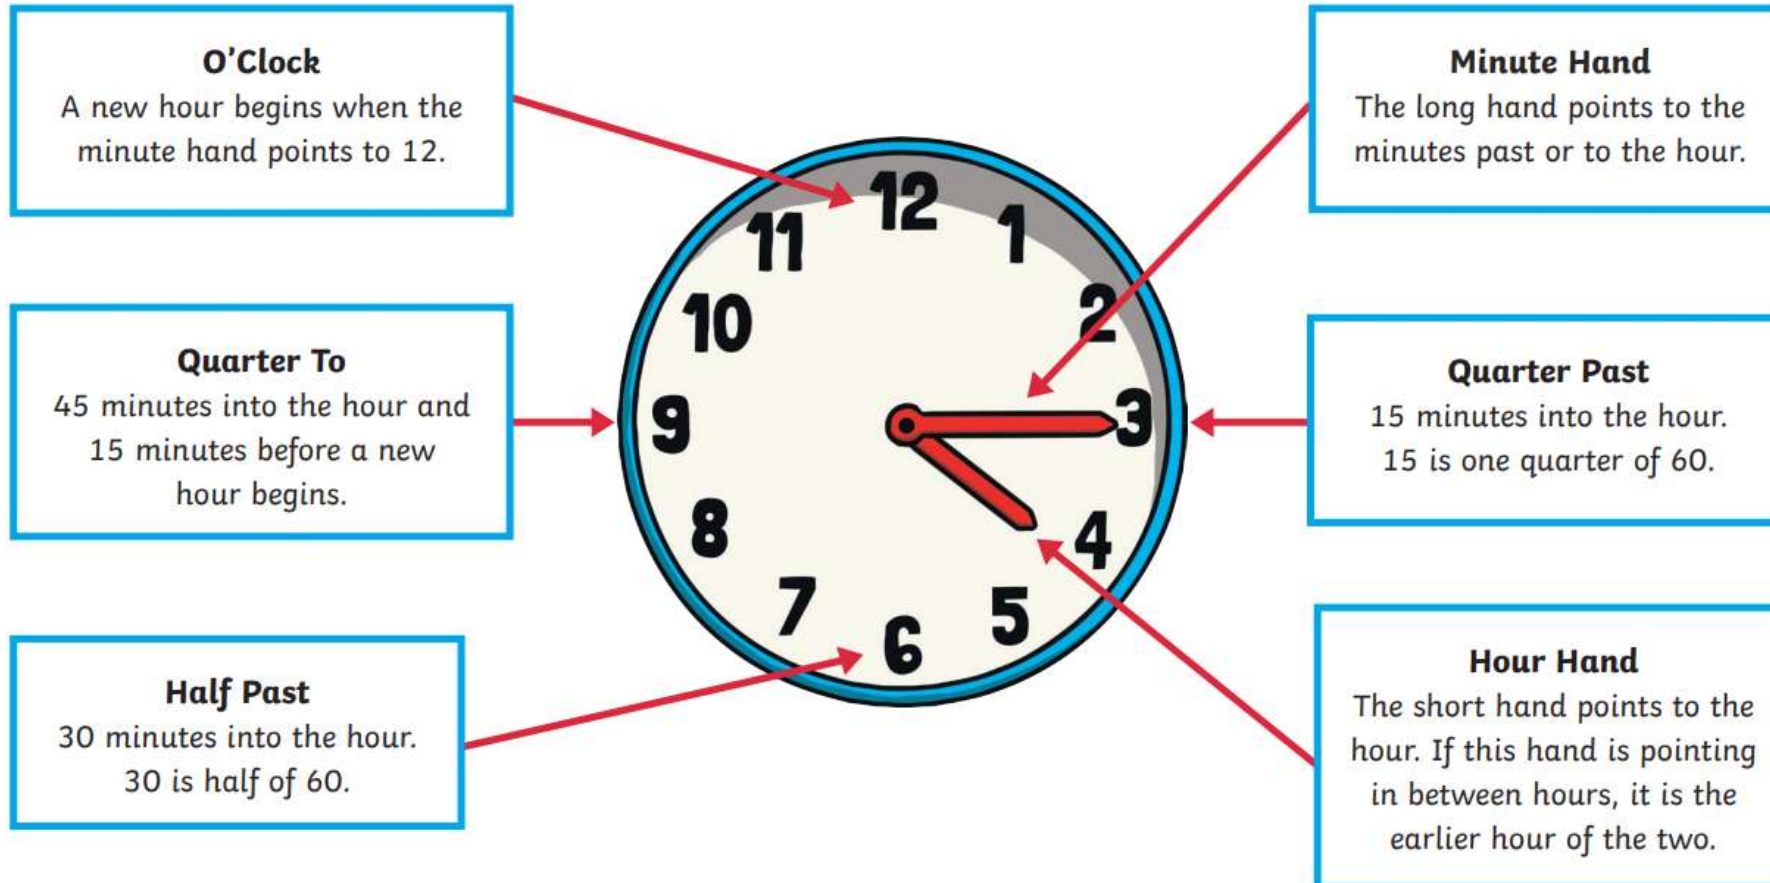

Mental Maths

Telling the Time

1 minute = 60 seconds
1 hour = 60 minutes
1 day = 24 hours

Mental Maths

Mental Math

Read and write the times on the clocks.

If you need help, use the mini clock.

23.02.2024

LQ: Can I find lines of symmetry in 2D shapes?

Steps to Success:

I know what symmetry means.

I can find the lines of symmetry on 2D shapes.

I can describe how many line of symmetry a shape might have.

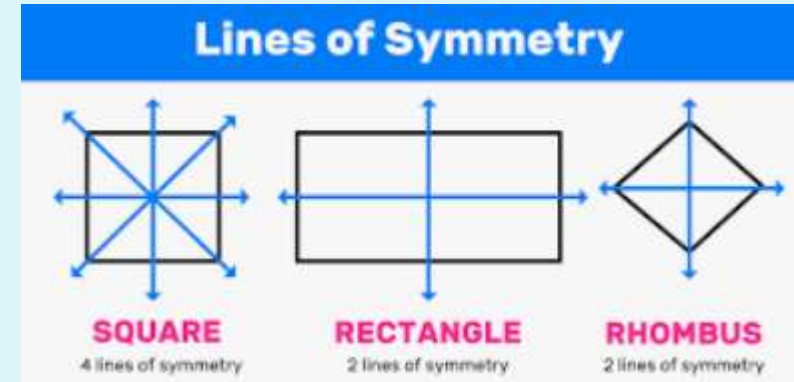

symmetry

line of symmetry

vertical

reflective

23.02.2024

LQ: Can I find lines of symmetry in 2D shapes?

TP- What does symmetry mean?
What does reflective mean?

23.02.2024

LQ: Can I find lines of symmetry in 2D shapes?

Symmetry

Something is symmetrical **when it has two matching halves**. You can check for symmetry in a shape by drawing a mirror line down the middle and seeing if both halves are identical.

Reflective

Reflective symmetry is **where a shape or pattern is reflected in a mirror line or a line of symmetry**. The shape that has been reflected will be the same as the original, it should also be the same size and it will be the same distance away from the mirror.

23.02.2024

Symmetry is all around us

We can see symmetry in nature, architecture, shapes and letters.

nature

architecture

letters

23.02.2024

LQ: Can I find lines of symmetry in 2D shapes?

Line of symmetry

Self assessment

Do you understand what a line of symmetry is?

TP - Where will the line of symmetry be on the butterfly? How do you know?

Look around the room. Can you see anything that has a line of symmetry?

23.02.2024

LQ: Can I find lines of symmetry in 2D shapes?

Where will the line of symmetry be on these 2D shapes?

With your partner use a mirror to see if you can find a line of symmetry.

What lines can be used to find lines of symmetry? Vertical? Horizontal? Diagonal? How do you know?

23.02.2024

LQ: Can I find lines of symmetry

Regular shapes have lines of symmetry

Not all shapes have lines of symmetry

Irregular shapes do not have lines of symmetry

Self assessment

Do you understand what a line of symmetry is?

23.02.2024

LQ: Can I find lines of symmetry in 2D shapes?

What shapes will the folded paper make if I unfold them?

Use the mirror to check what shapes each folded paper will make.

23.02.2024

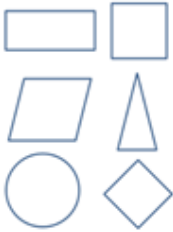

LQ: Can I find lines of symmetry in 2D shapes?

Self assessment

Do you understand what to do?

Complete the tasks in your book. Use a mirror to help you.
