

Monday 11th March 2024

Our Maths Learning Journey

Key vocabulary:
measure weight,
capacity, volume,
2s, 5s, 10s,
pattern, sequence,
counting, groups,
pair, unequal,
share

- 3 How many chocolates are in each row and column?

How many chocolates are in each box?

a)

b)

c)

There are chocolates in a row.

There are chocolates in a column.

There are chocolates in the box.

I will count up
using the rows.

I wonder whether
I will get the same
answer if I count up
using the columns.

L.Q. Can I count in 2's & 5's?

How many shoes are there?

Count in 2's.

How many groups are there?

Let's circle the groups.

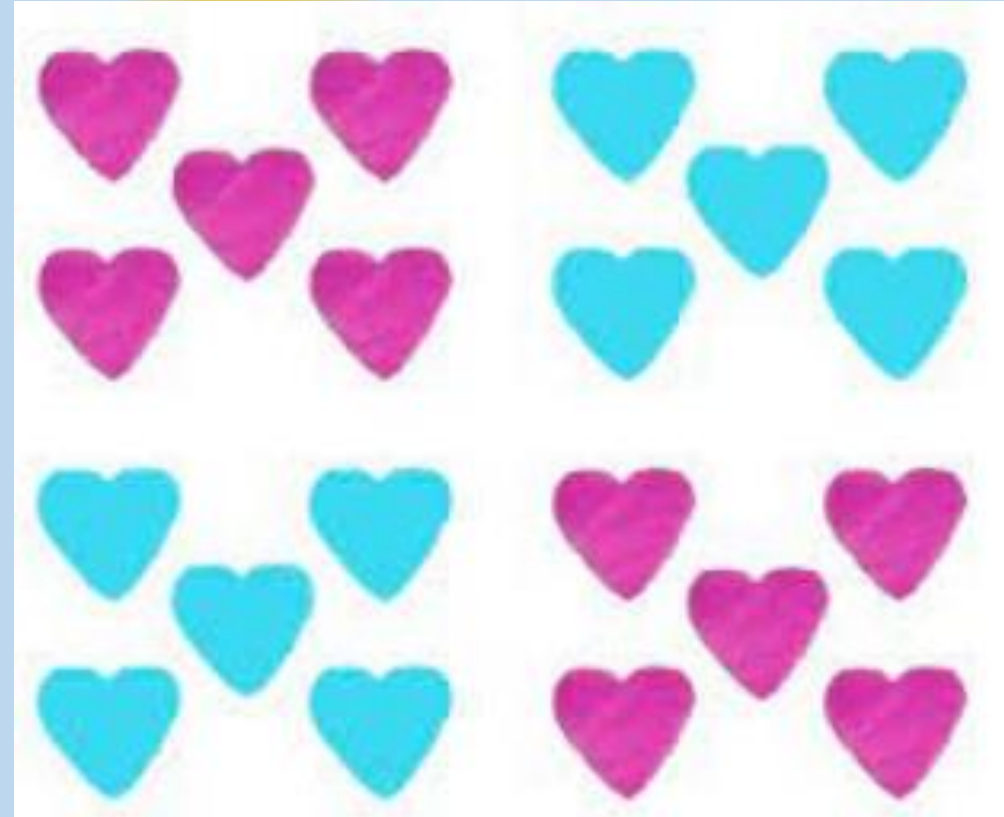

How many hearts are there?

Count in 5's.

How many groups are there?

Let's circle the groups

L.Q. Can I make doubles?

Steps to success

I can find the double of a given number.

I can explain what doubles are, using the appropriate vocabulary.

I can use representations that I am familiar with to show doubles.

Star words

doubles

groups

add

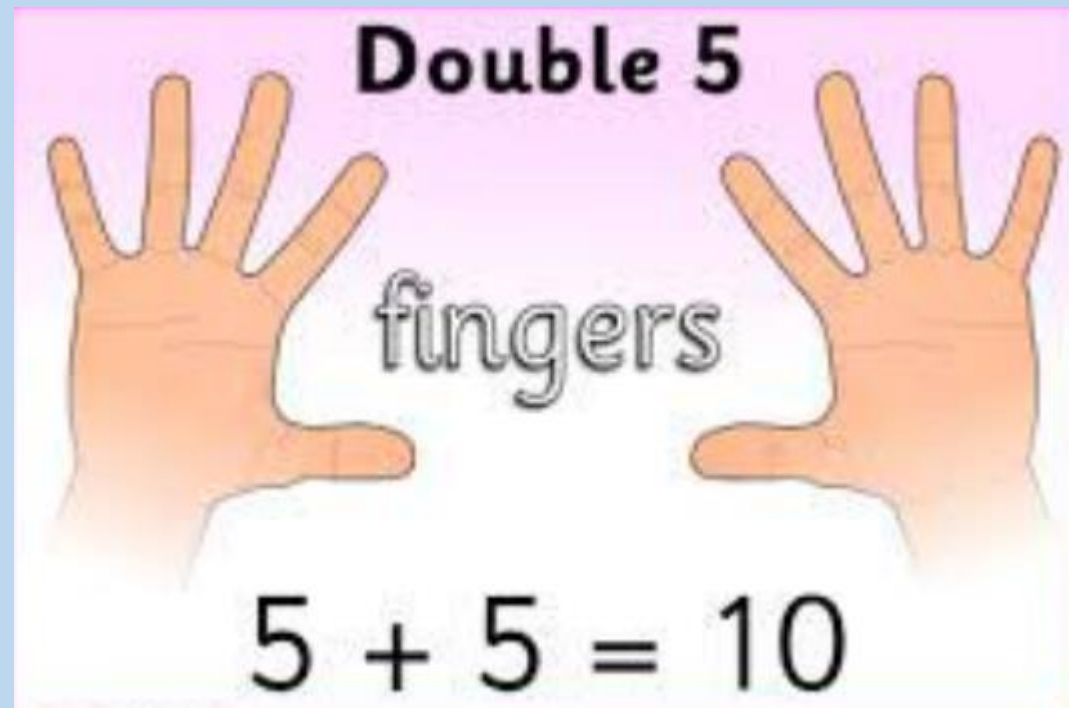

total

Let's make doubles using our fingers on both hands.

Show me double...

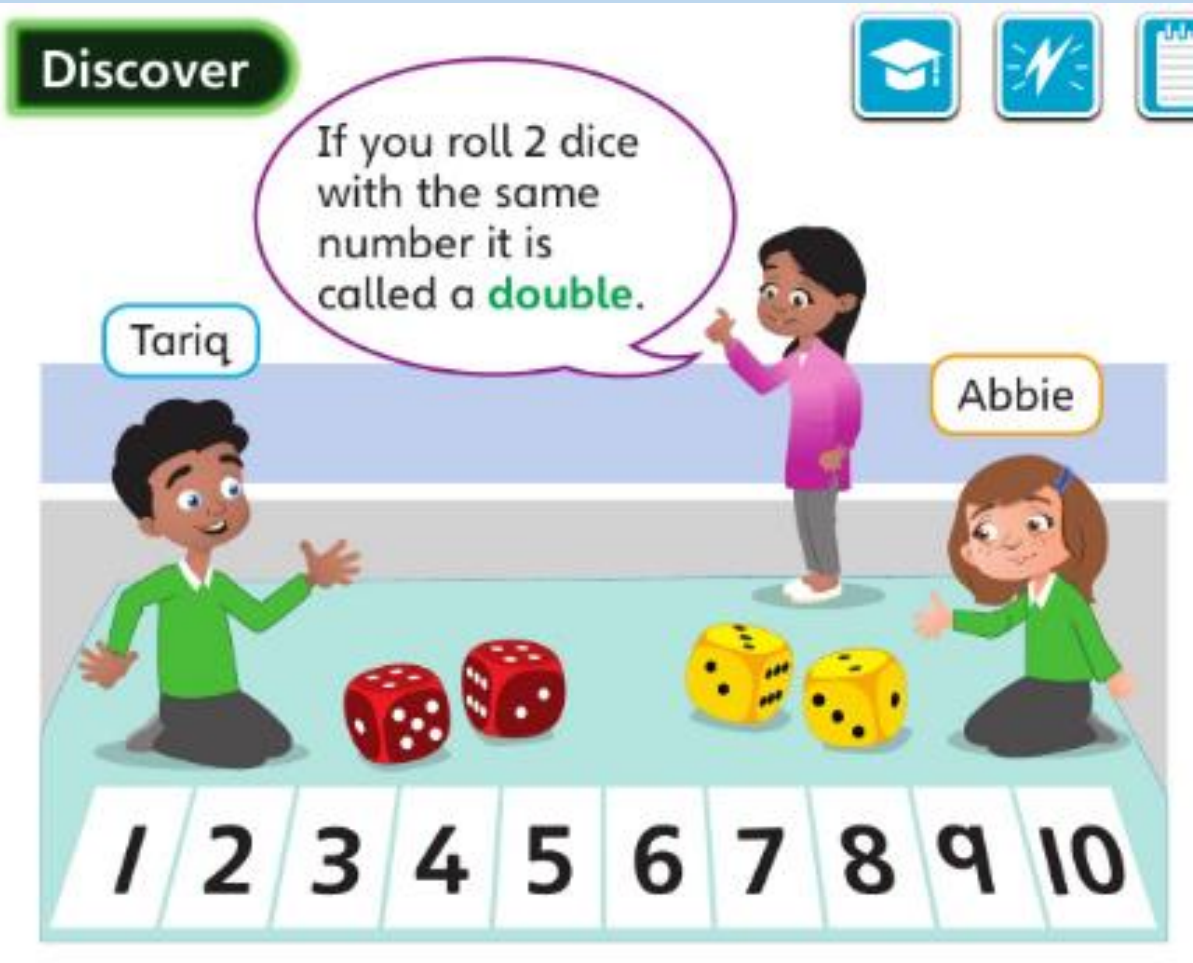

Discover

If you roll 2 dice with the same number it is called a **double**.

Tariq

Abbie

TPs: Who rolled doubles?
What is double 4?

Share

I drew a picture to find the double.

I added to find the double.

a) Tariq rolled a double.

Double 4 is two groups of 4.

●

●

●

●

4

●

●

●

●

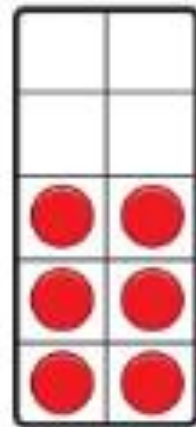

4

8

Double 4 is 8.

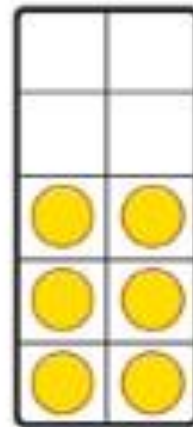

What is double 6?

b) Double 6 is two groups of 6.

6

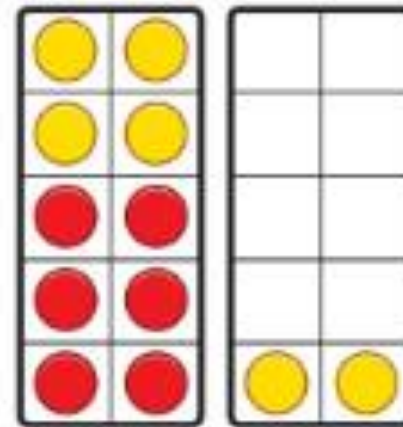

+

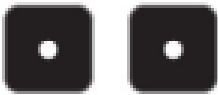

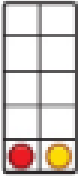

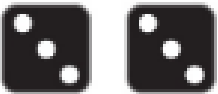

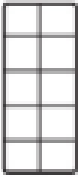

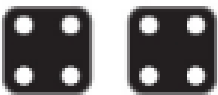

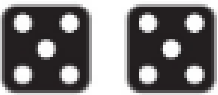

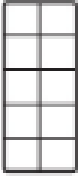

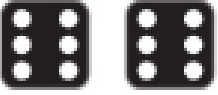

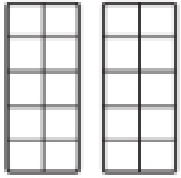

6

=

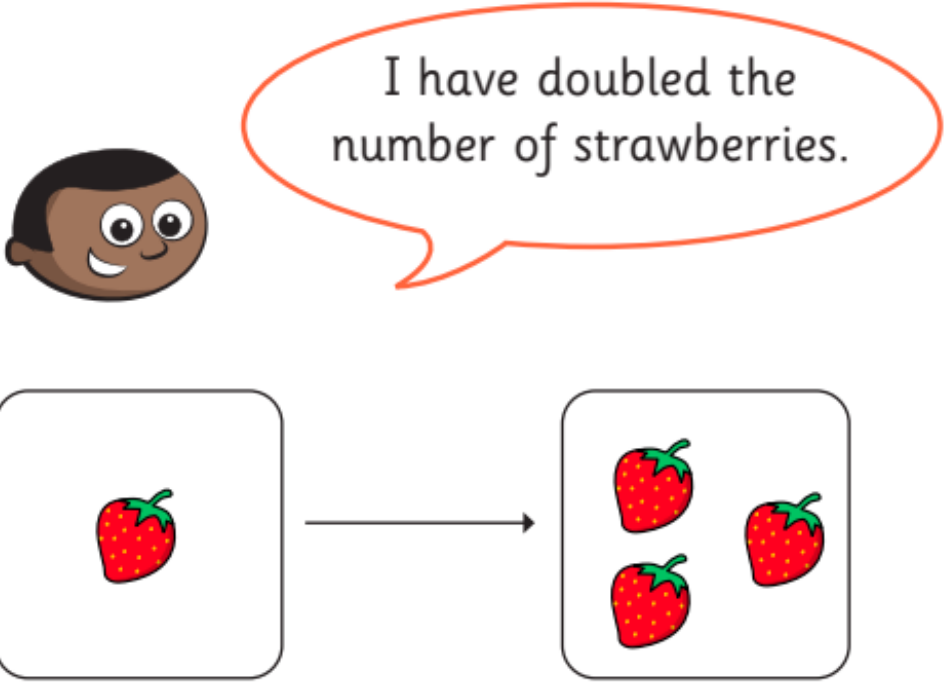

12

Double 6 is 12.

Number	Double	
		$1 + 1 = 2$
		$2 + 2 = \square$
		$3 + 3 = \square$
		$4 + \square = \square$
		$\square + \square = \square$
		$6 + 6 = 12$

Let's complete this table together.

I have doubled the number of strawberries.

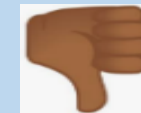

Do you agree with Mo? _____

Talk about it with a partner.

Yes, he is correct because _____.

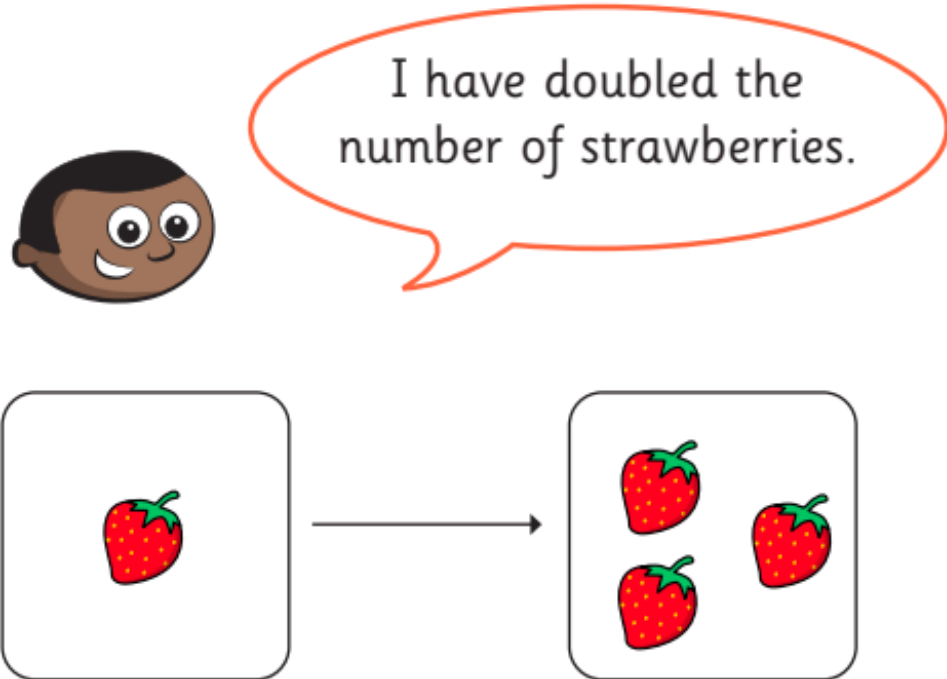

No, he is incorrect because _____.

Self assessment

Do you understand the reasoning task?

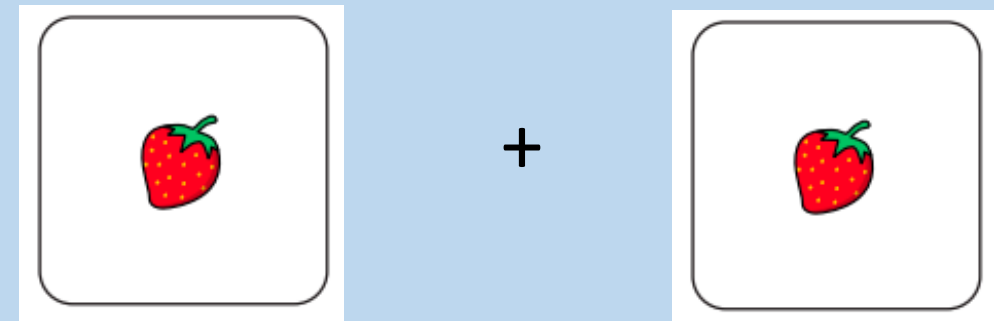

I have doubled the number of strawberries.

Do you agree with Mo? _____

Talk about it with a partner.

No, he is incorrect because **double 1 is 2.**

Your task

11.03.24

1.

Find and draw the double for these numbers.

3 5 8 9 13

Explain your work using the stem sentence.

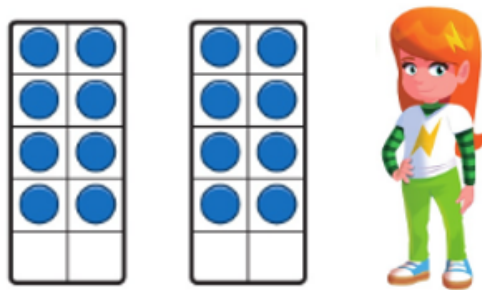

Stem Sentence:

Double ____ is ____

Challenge: Show your working out using number sentences.

2.

Astrid says double 8 is 16.
Is she correct? Explain how you know.

Stem Sentence:

Yes, she is correct because...

No, she is incorrect because...

3.

On Monday Miss Clarke ate 6 sweets.

On Tuesday, she ate double that amount.

How many sweets did she eat on Tuesday?

Today I played a game with a partner. I took turns to roll a dice and counted the corresponding number of objects. Then I doubled it and counted the total. I used the stem sentence 'Double ____ is ____' to explain my work.

Self assessment

Do you understand the tasks?

Tuesday 12th March 2024

L.Q. Can I make doubles?

*Work out the doubles for the following numbers.
Use your fingers to help you.*

3 5 2 4

L.Q. Can I make simple arrays?

Steps to success

I can recognise arrays as equal groups.

I know that arrays have rows and columns.

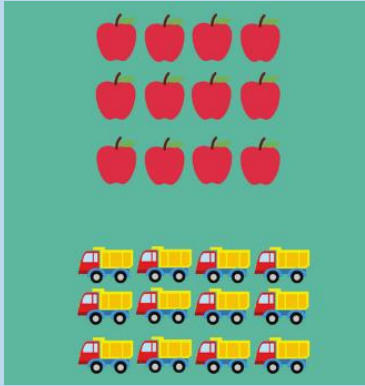

I can explain arrays can be read in two ways.

Star words

arrays

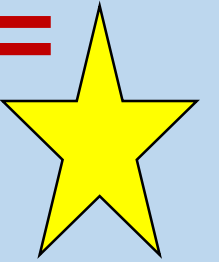

groups

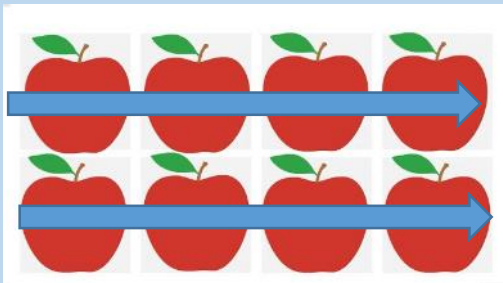

addition

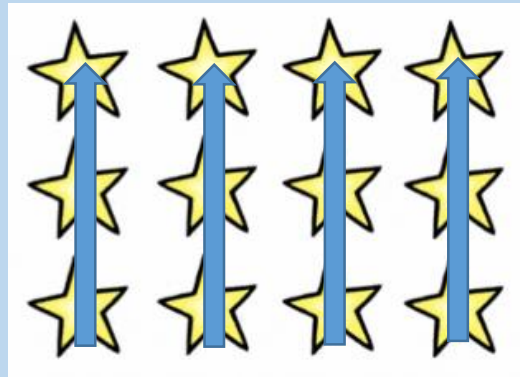

total

rows

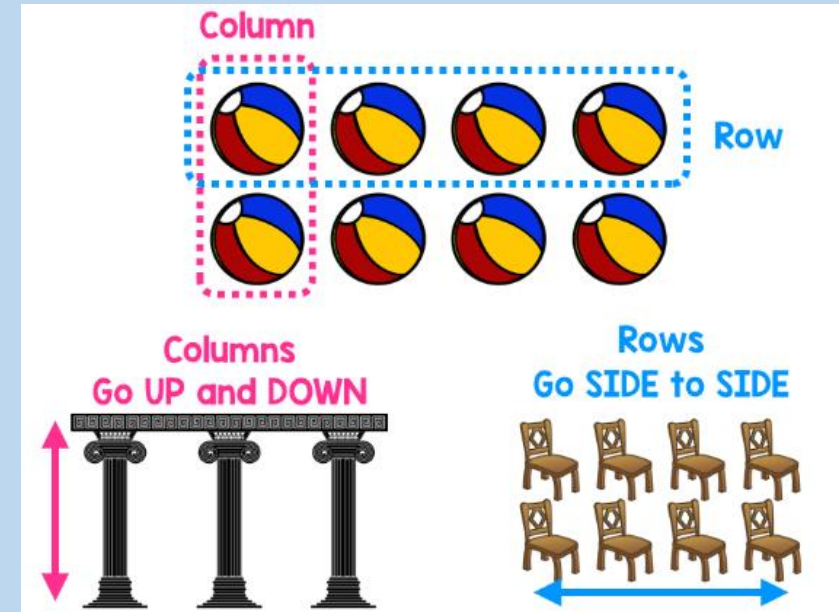

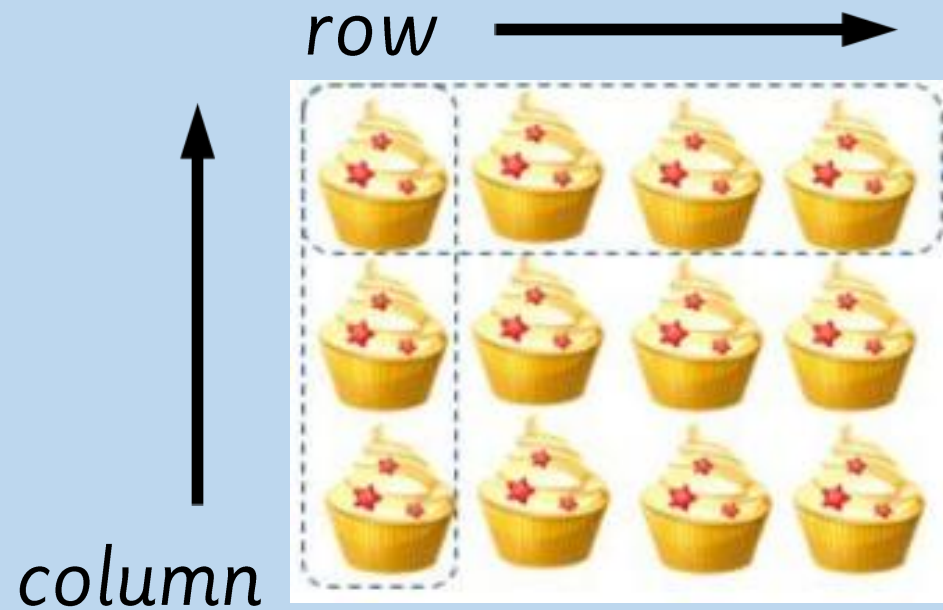

columns

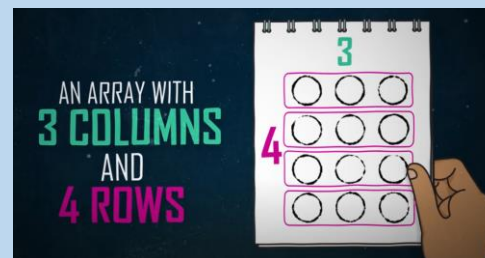

repeated addition

TP's: What do you notice?

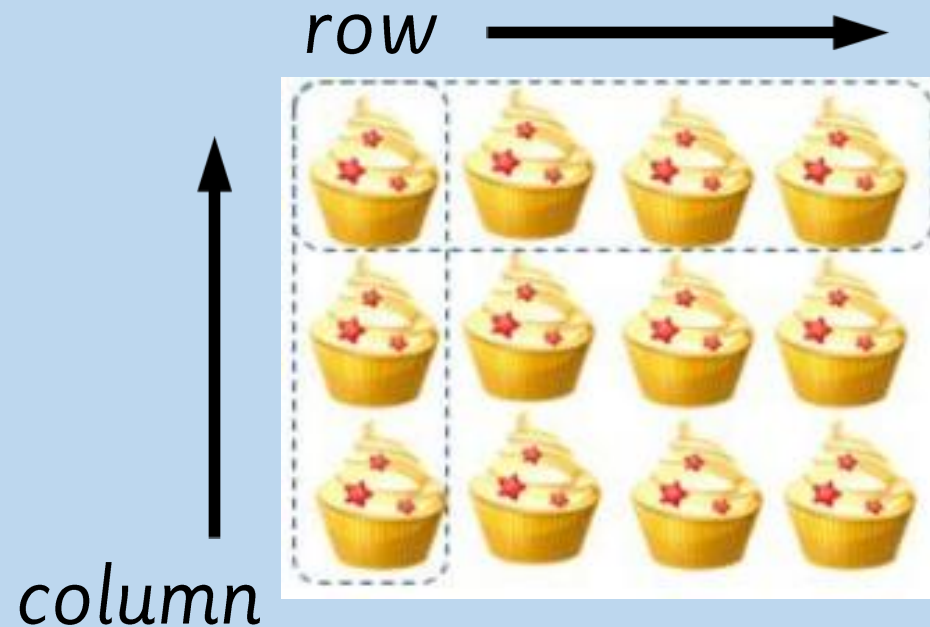

<https://www.youtube.com/watch?v=gzFbUZ8VjEg>

This is called an **array**.

Array means when pictures or objects are arranged in **rows** and **columns**. They can help us to count objects more efficiently (without making silly mistakes).

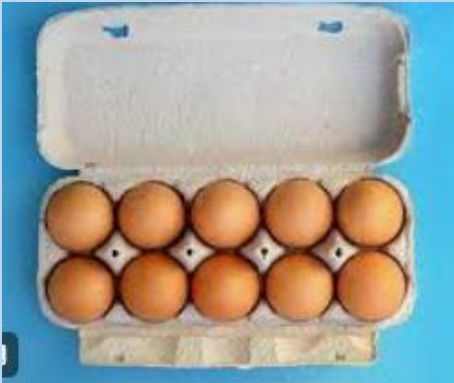

Self assessment

Do you understand what array mean?

In the real world there are arrays all around us.

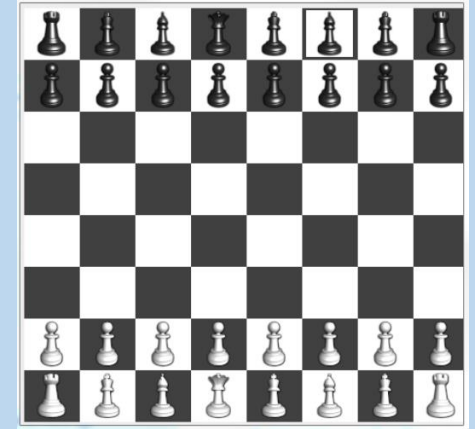

Egg box

Chocolate box

Chocolate bar

Chess board

Ice cube tray

Window panes

Cake tray

TP's: What do you notice?

They are in rows and columns.

TP's: How many rows?

How many columns?

How many stars are there altogether?

There are 5 rows of 5 stars.

There are 5 columns of 5 stars.

We can show this as:

$$5+5+5+5+5=25$$

This is called a repeated addition. Repeated addition is adding lots of equal groups together.

Remember: You don't need to count every star.

For this one you could count in 5s!

TP's: How many muffins are there?

Instead of counting one by one,
we can skip count by twos.

Or count them
by four by
doubling it.

How many rows? How many columns?

Stem sentence:

There are ____ rows of ____ muffins.

There are ____ columns of ____ muffins.

There are 2 rows of 4 muffins.

There are 4 columns of 2 muffins.

We can show this as:

$4+4=8$ or as repeated addition $2+2+2+2+=8$

Let's practise making arrays with the counters or cubes. Remember to arrange them neatly in rows and columns (evenly spaced out) so we can count them efficiently.

2 groups of 3: $3+3=6$

or

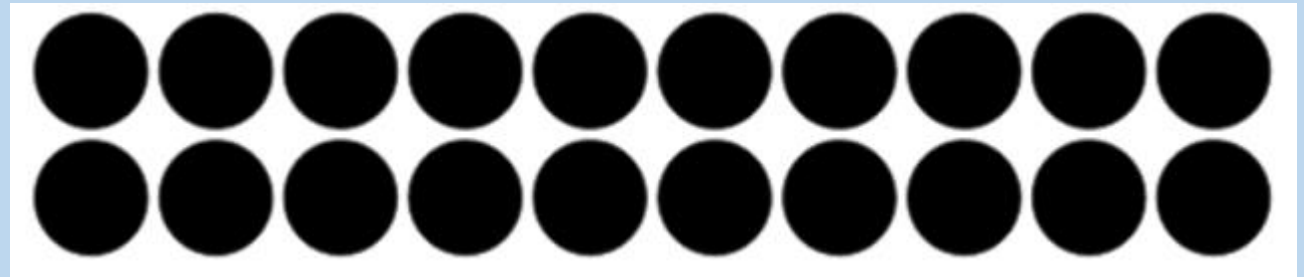

3 groups of 2: $2+2+2=6$

5 groups of 3: $3+3+3+3+3=15$

or

3 groups of 5: $5+5+5=15$

2 groups of 10: $10+10=20$

or

10 groups of 2: $2+2+2+2+2+2+2+2+2+2=20$

Challenge: What will the number sentences look like for each one?

Your task

Work with a partner and make simple arrays for the following numbers. Use counters or cubes and tell your partner how many rows and columns there are. Explain how many counters are in each row and each column.

4 6 8 10 12 15 20 30

Remember to arrange the concrete objects neatly in rows and columns evenly spaced out.

Self assessment

Do you understand the task?

Wednesday 13th March 2024

Let's make doubles

<https://www.youtube.com/watch?v=OYWclXKzOJo>

The graphic features a dark blue background with the word **DOUBLES** in large, bold, yellow letters with a black outline. Below it, the text 'by NUMEROCK' is written in white, with a small guitar icon next to the word 'NUMEROCK'. Surrounding the central text are several double addition facts in white: $2+2=4$, $9+9=18$, $3+3=6$, $1+1=2$, $11+11=22$, $10+10=20$, $4+4=8$, $7+7=14$, and $5+5=10$.

DOUBLES
by NUMEROCK

$2+2=4$ $9+9=18$ $3+3=6$ $1+1=2$
 $11+11=22$ $10+10=20$ $4+4=8$
 $7+7=14$ $5+5=10$

L.Q. Can I make simple arrays?

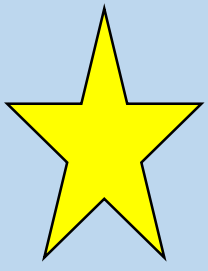

Steps to success

I can recognise arrays as equal groups.

I know that arrays have rows and columns.

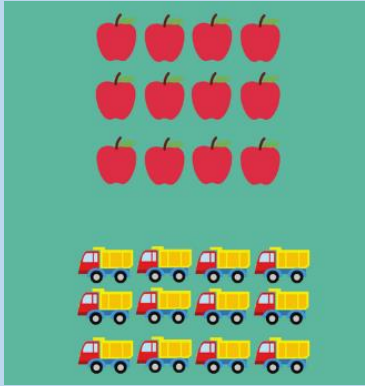

I can explain how arrays can be read in two ways.

Star words

arrays

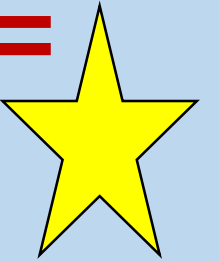

groups

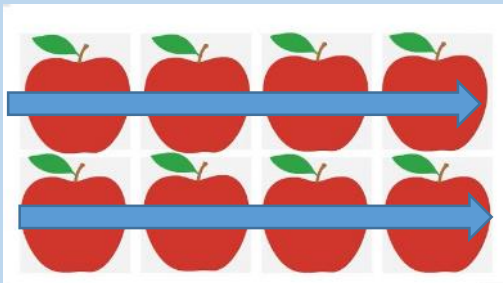

add

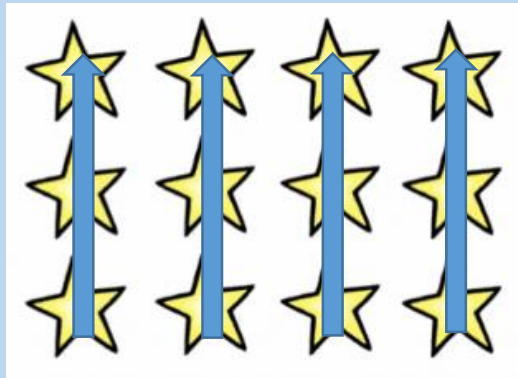

total

rows

columns

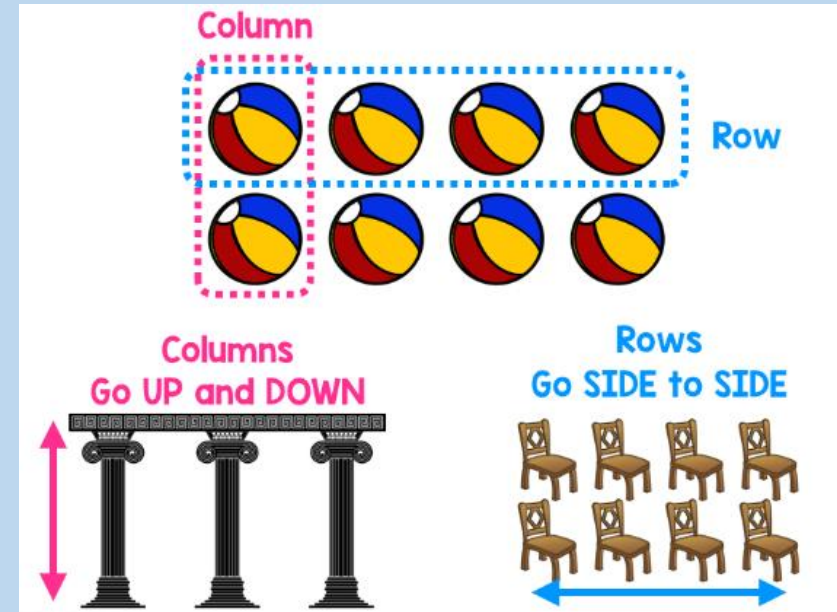

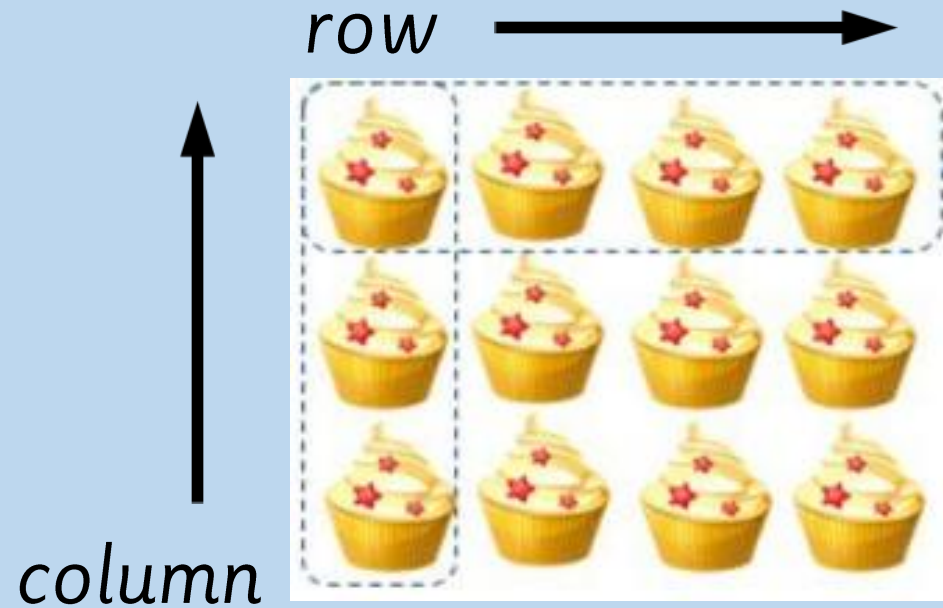

repeated addition

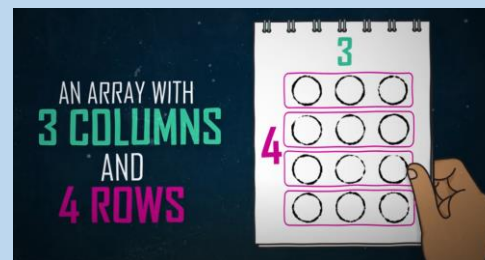

Let's recap

TP's: What do you remember about arrays?

<https://www.youtube.com/watch?v=gzFbUZ8VjEg>

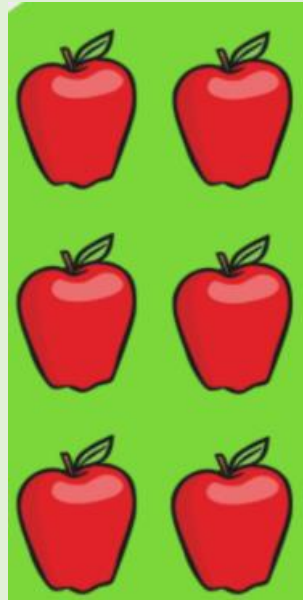

LQ: Can I make simple arrays?

→
How many rows?

How many apples in each row?

Write the number sentence to match.

↓
How many columns?

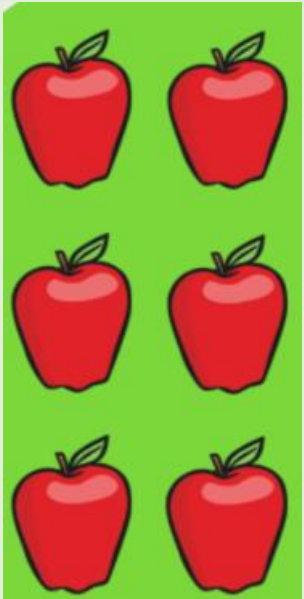

How many apples in each column?

Write the number sentence to match.

3 rows of 2 apples

$$2+2+2=6$$

2 columns of 3 apples

$$3+3=6$$

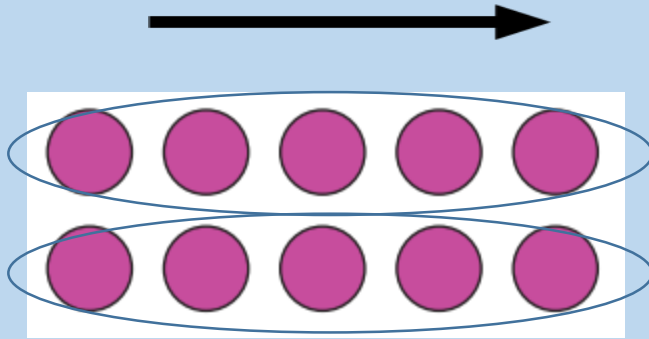

Do you notice any number patterns?

Self assessment

Do you understand how to read arrays?

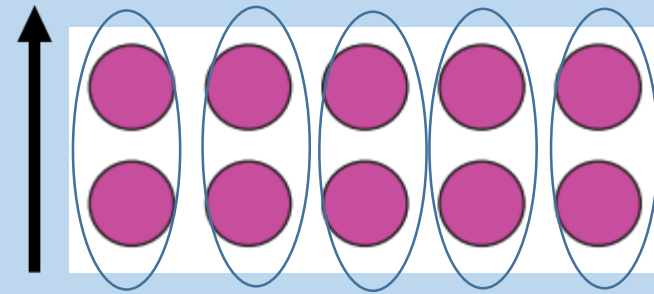

TPs: How many rows?

There are ____ rows.
There are ____ counters in each row.

2 rows of 5 counters
 $5+5=10$

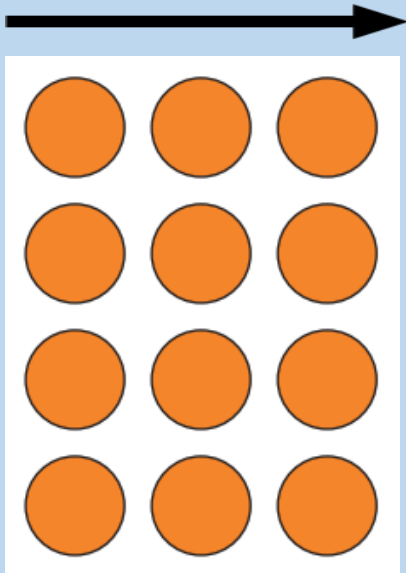

TPs: How many columns?

There are ____ columns.
There are ____ counters in each column.

5 columns of 2 counters
 $2+2+2+2+2=10$

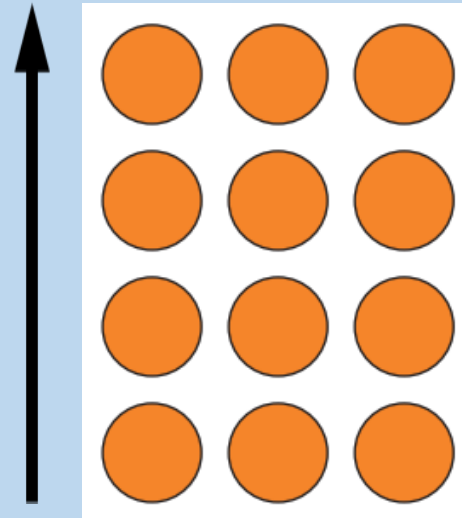

TPs: How many rows?

There are ____ rows.

There are ____ counters in each row.

TPs: How many columns?

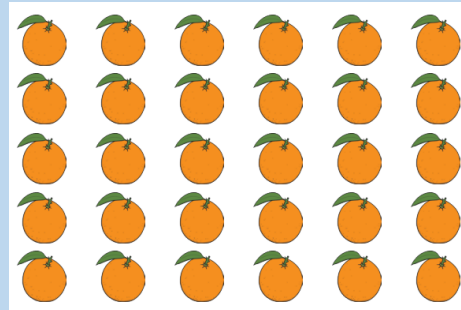

There are ____ columns.

There are ____ counters in each column.

Your task

Make simple arrays for any of the following numbers with counters or cubes and explain how many counters there are in each row and each column. Explain to your friend how many you have altogether.

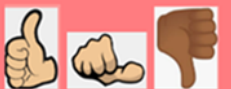

4 6 9 10 12 15 18 20 25 30

Challenge: Can you write the number sentences to match?

Self assessment

Do you understand the task?

Thursday 14th March 2024

L.Q. Can I make equal groups?

Can you share the gold bars equally?
Answer the questions.

There are _____ bars altogether.

There are _____ boxes.

Put _____ bars in each box.

Challenge: Use a whiteboard and pen to practise sharing equally using pictorial representation.

L.Q. Can I make simple arrays?

Steps to success

I can recognise arrays as equal groups.

I know that arrays have rows and columns.

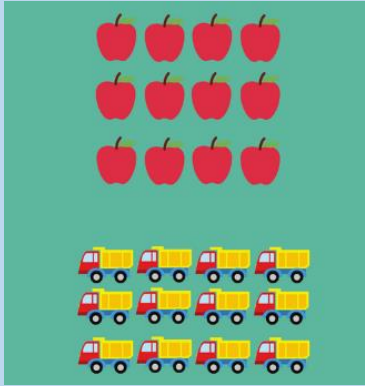

I can explain how arrays can be read in two ways.

Star words

arrays

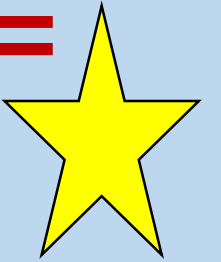

groups

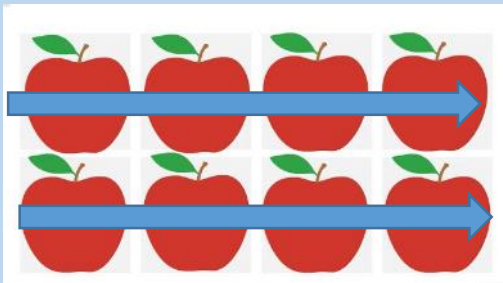

add

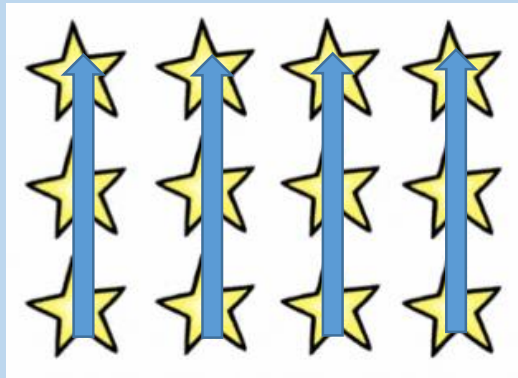

total

rows

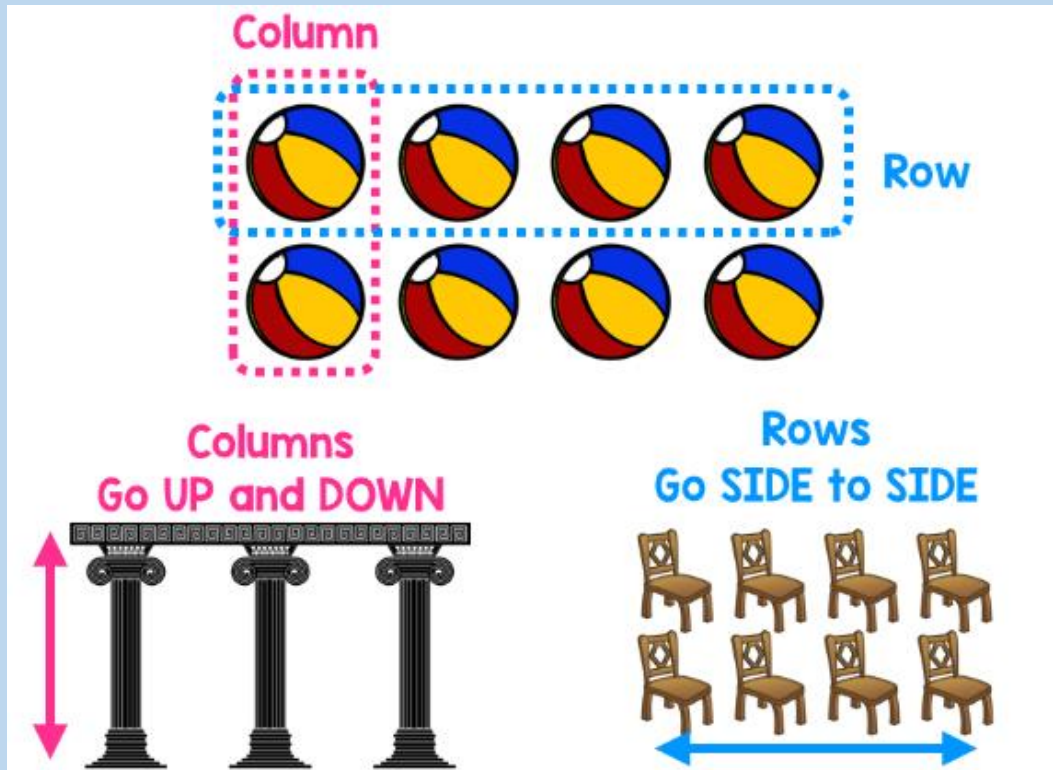

columns

Let's recap

TP's: What do you remember about arrays?

Array means when pictures or objects are arranged in **rows** and **columns**. They can help us to count objects more efficiently.

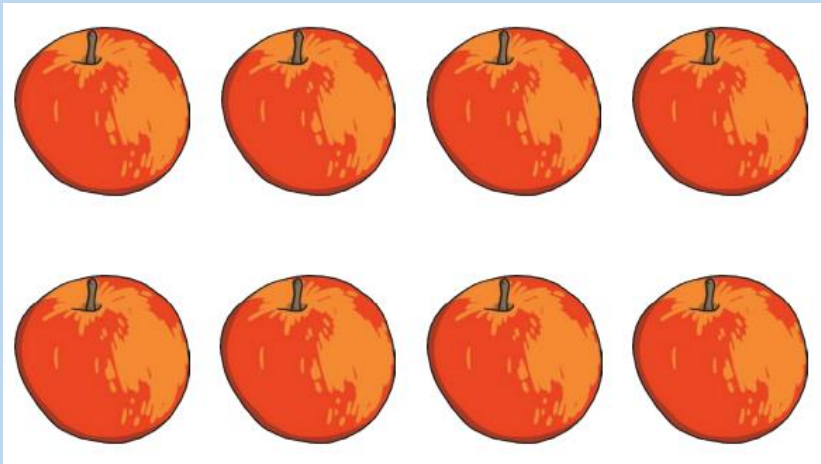

Self assessment

Do you understand what array means?

LQ: Can I make simple arrays?

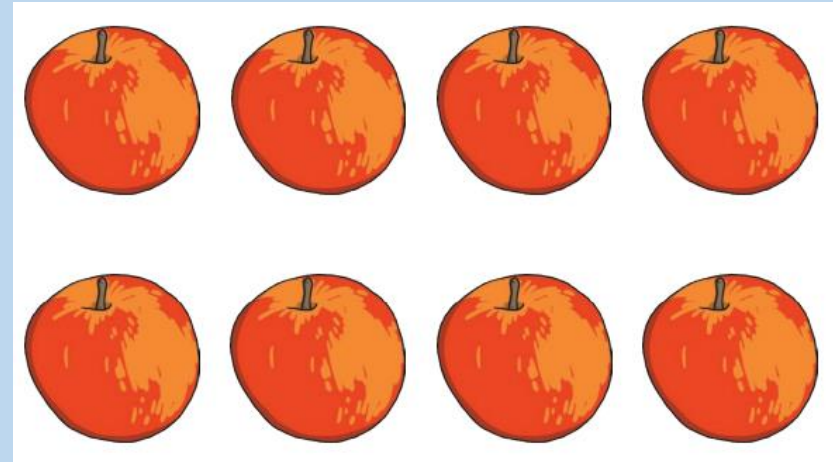

TPs: How many rows?
How many apples in each row?

There are ____ rows.
There are ____ apples in each row.

2 rows of 4 apples.
 $4 + 4 = 8$

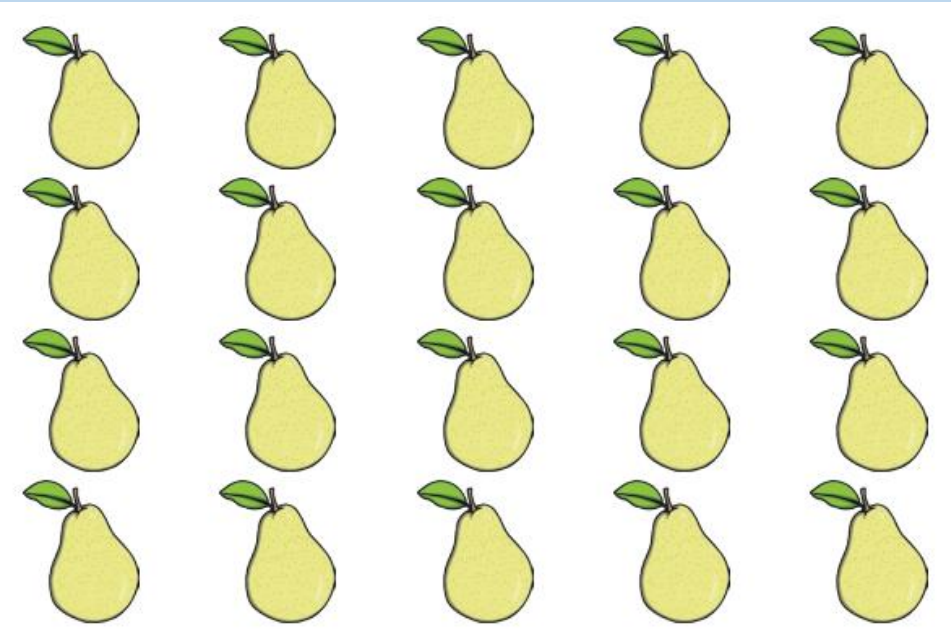

TPs: How many columns?
How many apples in each column?

There are ____ columns.
There are ____ apples in each column.

4 columns of 2 apples.
 $2 + 2 + 2 + 2 = 8$

Let's complete the statement and repeated addition.

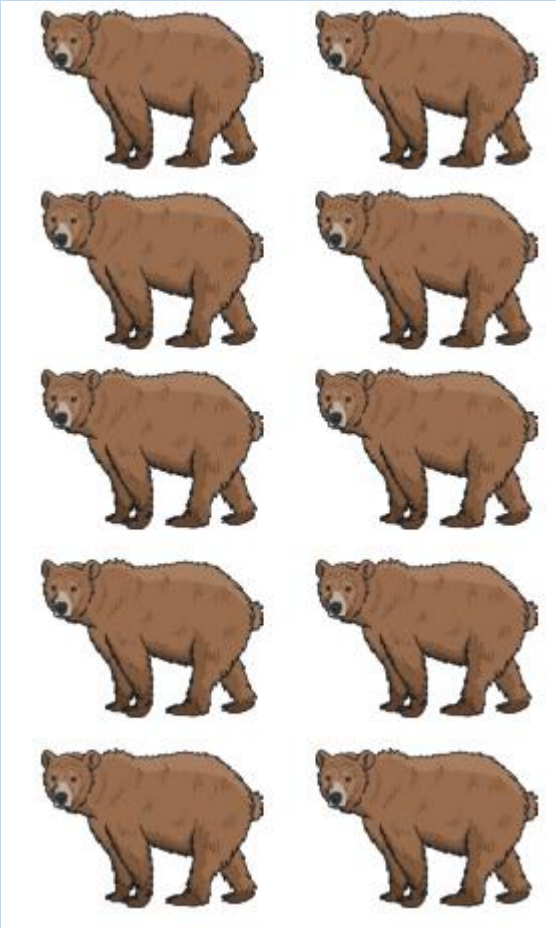

_____ rows of _____ pears.
_____ + _____ + _____ + _____ = _____

Adult to model - Children to have whiteboards to practice writing addition and repeated addition number sentences.

LQ: Can I make simple arrays?

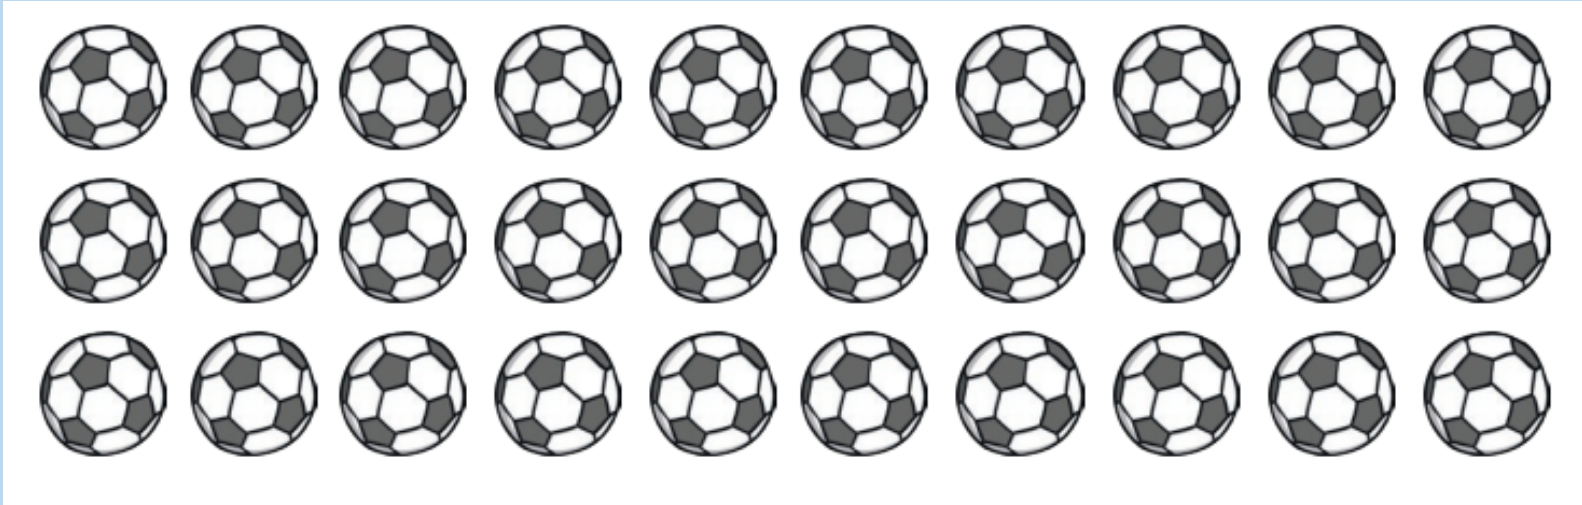

Complete the statement and repeated additions.

_____ rows of _____ bears.
 _____ + _____ + _____ + _____ + _____ = _____

Adult to model - Children to have whiteboards to practice writing addition and repeated addition number sentences.

Complete the statement and repeated additions.

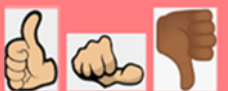

_____ rows of _____ balls.

_____ + _____ + _____ = _____

Adult to model - Children to have whiteboards to practice writing addition and repeated addition number sentences.

Self assessment

Do you understand how to explain the
complete the repeated addition?

Your task

1.
Complete the statements and repeated addition.

Can you write a repeated addition number sentence?

2.
Miss Brook says there are 2 columns.
Is she correct? Explain how you know.

Stem Sentence:

Yes, she is correct because...

No, she is incorrect because...

3.
Circle each row of donuts.

Write a repeated addition number sentence to match the rows.

_____ + _____ + _____ =

1.

_____ rows of _____ seeds.

_____ column of _____ seeds.

There are _____ seeds altogether.

Self assessment

Do you understand the tasks?

Today I used counters to make simple arrays for the numbers '4, 6, 8, 10' and '12' and counted the rows and columns, describing how many counters were in each row and how many counters were in each column.

Friday 15th March 2024

Consolidation

*Today we consolidated our learning
on multiplication.*

- *Making equal groups of 2s, 5s and 10s*
- *Making doubles*
- *Arrays*
